PRESS RELEASE

**For Immediate Release:
September 5, 2014**

Cely Construction Company Inc. is proud to announce the successful completion of GHS Downtown.

Cely Construction completed the 46000 SF Corporate Headquarters for GHS in June of this year. The project consisted of partial demolition and renovation of the 5 story SunTrust building on McBee Avenue in downtown Greenville.

“GHS takes giving back and supporting the communities they serve very seriously; and it was our pleasure to partner with them and McMillan Pazdan Smith to provide the space they need to continue to strategically serve their clients”, said Steve Henderson, project manager for Cely Construction.
